Discovering the Cloud: Exploring IaaS, PaaS, and SaaS

Open-Ended Response Questions

1. Reflect on how cloud computing services like IaaS, PaaS, and SaaS have transformed the way businesses operate and individuals use technology. Discuss their impact on efficiency, accessibility, and innovation.
2. Consider a scenario where a small startup is looking to develop and launch a mobile app. Explain the advantages of using Platform as a Service (PaaS) for their development process, including specific tools or services that would benefit them.
3. Discuss the potential challenges that organizations may face when adopting Software as a Service (SaaS) applications. What strategies can businesses implement to address these challenges effectively?
4. In your opinion, how might cloud computing services continue to evolve in the future, and what new possibilities could they unlock for individuals and businesses?
