Healthy Cities: How Urban Planners Tackle Public Health and Sanitation

Open-Ended Response Questions

1. Imagine you are an urban planner in a city facing a public health crisis, such as a disease outbreak. What strategies and facilities would you propose to address the crisis and protect the health of the residents?
2. Discuss the importance of safety measures in urban planning and how they contribute to public health. Provide examples of safety features in cities that help prevent accidents.
3. What are some innovative ways urban planners can incorporate sustainability into their designs to promote public health? Provide examples of sustainable practices that benefit both the environment and residents' well-being.
4. Reflect on the challenges of balancing economic development with public health in urban planning. How can cities strike a balance between promoting economic growth and ensuring the health and well-being of their residents?
