## What Does a Sea Turtle Look Like?

### Short Answer Key

1. Sea turtle flippers are used for swimming and digging nests.
2. A sea turtle's shell protects its body and helps it move smoothly through the water.
3. Sea turtles' shells can be green, brown, gray, black, yellow, or orange.
4. Sea turtles can't pull their heads into their shells because their bodies are streamlined for swimming.
5. The leatherback turtle has a soft, rubbery shell instead of a hard one, which helps it dive deep into the ocean.
