

Name _____

Where Does a Sea Turtle Live?

Short Answer Key

1. Sea turtles are often found in seagrass beds and coral reefs.
2. Sea turtles need warm waters to keep their bodies at the right temperature.
3. Coral reefs provide food and protection for sea turtles, especially hawksbill turtles.
4. Kemp's ridley turtles nest on the same beaches every year, often in large groups.
5. People can help protect sea turtles by reducing ocean pollution and protecting nesting beaches.
