

Name _____

Titanic's Lost Secrets

Short-Answer Answer Key

1. The Titanic was hard to find because it was 2.5 miles underwater and required advanced technology to locate.
2. Dr. Ballard used a robotic submarine called Argo with cameras that could handle deep-sea pressure.
3. After the Titanic disaster, ships were required to carry enough lifeboats for everyone onboard.
4. Explorers found boilers, staircases, and other parts of the Titanic.
5. The Titanic's story is important because it reminds us of human tragedy, resilience, and the power of exploration.
