## Safari Surprises in the Serengeti

Welcome to the Serengeti, a vast and wild landscape in Africa filled with amazing animals and incredible adventures! The Serengeti is famous for its annual wildebeest migration, where millions of these animals travel across the plains in search of fresh grass.

One of the Serengeti's most iconic residents is the lion, known as the king of the jungle. Lions live in groups called prides and spend their days resting and hunting.

Giraffes, with their long necks, can be seen gracefully munching on tall trees. Did you know that they have the same number of neck bones as humans?

The Serengeti is also home to the fast and elegant cheetah, the tallest bird in the world, the ostrich, and the massive African elephant, which can weigh as much as two cars!

While exploring the Serengeti, you might spot playful zebras, colorful flamingos in the wetlands, and even the elusive leopard, known for its stealth and agility.
