

Name _____

The Secret Annex: Analyzing the Setting of 'The Diary of Anne Frank'

Short Answer Key

1. The secret annex consists of several rooms, including the attic, where Anne and Fritz Pfeffer have their bedrooms, and the main living area shared by the two families. There is also a concealed entrance and a storeroom for supplies.
2. The close confinement in the annex leads to tension among the residents, affecting their relationships and interactions. For example, Anne's relationship with her mother becomes strained, and conflicts arise among the adults in the annex.
3. Resourcefulness is essential in the annex because the residents must make do with limited supplies and space. For instance, Anne finds creative ways to entertain herself and continue her education.
4. The historical context of World War II and the Holocaust is significant because it led to the annex's use as a hiding place for Jewish families seeking refuge from Nazi persecution and deportation. The annex represents the extreme measures taken during this time.
5. Anne Frank's diary provides insights into daily life in the annex by documenting the residents' experiences, relationships, challenges, and their emotional and psychological struggles.
