

Name _____

Picking the Perfect Sewing Machine: A Stitch in Time

Short Answer Key

1. Some factors to consider when thinking about the purpose of your sewing machine include the type of projects you want to tackle (e.g., garments, quilting, embroidery) and the specific features needed for those projects.
2. Two features to pay attention to are the number of built-in stitches and the availability of different presser feet.
3. The size and weight of a sewing machine might be important for people with limited sewing space or those who need to transport their machine frequently.
4. Accessories to look for include a seam ripper, bobbins, extra needles, and additional presser feet for various sewing techniques.
