

Name _____

What Are Sloths' Daily Habits and Behaviors?

Short Answer Key

1. Sloths are nocturnal because they are most active at night and sleep during the day.
2. A sloth's greenish fur helps it blend in with the leaves, making it hard for predators to spot.
3. Sloths spend most of their time in trees to stay safe from predators and to find food easily.
4. After a baby sloth grows up, it becomes independent and lives alone.
5. Sloths conserve energy by sleeping for long hours, moving slowly, and eating low-calorie food.
