

Name _____

What Is a Sloth's Life Cycle Like?

Short Answer Key

1. It takes about three years for a sloth to grow into an adult.
2. A baby sloth learns how to climb, find food, and stay safe from predators by watching its mother.
3. Sloths move slowly to conserve energy and avoid drawing attention from predators.
4. Sloths eat leaves, fruits, and flowers.
5. A slow lifestyle helps sloths conserve energy and stay hidden from predators in the rainforest.
