

Name _____

What Are Sloth Predators and Threats?

Short Answer Key

1. Jaguars, ocelots, and harpy eagles are predators of sloths.
2. A sloth's slow movement helps it avoid being noticed by predators.
3. Parasites like ticks and mites can live in sloth fur, and some can cause illnesses.
4. When rainforests are cut down, sloths lose their homes and food sources.
5. Humans can protect sloths by conserving rainforests and creating safe habitats.
