## Does a Sloth Form Relationships with Other Species?

### Open-Ended Response Questions

1. Why do you think it is important for sloths to have these relationships with other species?
2. How might the relationship between sloths and algae be affected if the rainforest environment changes?
3. In what ways do sloths contribute to the ecosystem through their interactions with other species?
4. Do you think the parasites that live on sloths are entirely harmful, or could they serve any useful purpose in the ecosystem? Why?
