

Name _____

Solar Panels and Solar Farms: How Do They Work Together?

Open-Ended Response Answer Key

1. Using both helps make more clean energy for everyone—from big cities to small homes.
2. I would include houses with solar rooftops, solar-powered streetlights, and a big solar farm nearby to power schools and stores.
3. Some people might think solar panels cost too much or don't get enough sun where they live.
4. Solar energy is cleaner, doesn't pollute the air, and helps fight climate change.
