

Name _____

Can Solar Power Help Solve the Climate Crisis?

Short Answer Key

1. Fossil fuels are coal, oil, and gas. Burning them pollutes the air and causes the planet to get warmer.
2. Solar panels turn sunlight into electricity using special materials.
3. Solar panels can be placed on rooftops or in large solar farms.
4. Solar power is clean and uses free sunlight.
5. Because they need sunlight, they don't work well at night or on cloudy days.
