

Name _____

Can Solar Power Help Solve the Climate Crisis?

Open-Ended Response Answer Key

1. Solar power is clean, renewable, and helps reduce pollution, which is good for the future of our planet.
2. A city may not have enough sunny days or money to install solar panels everywhere.
3. We could use solar panels at school, or have lights and chargers powered by solar energy.
4. I would invent a battery that stores more solar energy so we could use it anytime.
