

Name _____

What Happens If Every School in the Country Switched to Solar Power

Short Answer Key

1. Solar power is energy from the sun. Solar panels turn sunlight into electricity.
2. It helps schools save money and reduces pollution.
3. Students could learn about science, energy, and helping the planet.
4. Fossil fuels are coal, gas, and oil. They cause pollution and climate change.
5. Some schools don't get enough sun or don't have the money to install panels.
