The Sun's Sparkling Role: How It Powers the Water Cycle

Short Answer

1. Explain how the Sun's energy influences evaporation in the water cycle.
2. Describe the role of the Sun in condensation and cloud formation.
3. How does the Sun contribute to the changing seasons and their impact on the water cycle?
4. What are some examples of how the Sun's energy affects climate and weather patterns on Earth?
5. Discuss the importance of understanding the Sun's role in the water cycle for studying climate change.
