## Where Stink Bugs Call Home

### Short Answer Key

1. Stink bugs prefer habitats with abundant plants, such as forests, gardens, and fields.
2. They are drawn to orchards because they feed on fruits from trees.
3. Stink bugs might hide under leaves, inside tree bark, or in building cracks.
4. The brown marmorated stink bug has spread through travel and trade between regions.
5. During cold months, stink bugs seek shelter in warm places like buildings.
