

Name _____

Where Stink Bugs Call Home

Open-Ended Response Answer Key

1. Stink bugs survive in many places because they adapt quickly to new environments and have a varied diet.
2. Farming and gardening provide stink bugs with abundant food sources, which makes these areas ideal habitats for them.
3. Stink bugs damage crops by feeding on fruits and vegetables, forcing farmers to find new pest control methods.
4. Without camouflage, stink bugs might become more vulnerable to predators and have a harder time surviving.
