

Name _____

What Do Stink Bugs Eat?

Short Answer Key

1. Herbivorous stink bugs eat plants like fruits, vegetables, and crops.
2. Stink bugs commonly feed on crops like tomatoes, corn, or soybeans.
3. Predatory stink bugs use their proboscis to pierce prey and consume their fluids.
4. The proboscis is used to pierce plants or prey and suck out their juices.
5. Omnivorous stink bugs can switch between eating plants and insects, allowing them to adapt.
