

Name _____

The Daily Life of Stink Bugs

Open-Ended Response Answer Key

1. Stink bugs' daily activities, such as searching for food and finding shelter, help them gather energy and stay safe from predators.
2. Gathering in groups helps stink bugs conserve warmth during winter, but they don't need to stay together in warmer weather.
3. Pheromones allow stink bugs to communicate important messages, like warnings about predators or attracting mates, helping them survive and reproduce.
4. In a garden during the day, you might see stink bugs crawling on plants, flying, or using their proboscis to feed on plant juices.
