

Name _____

The Predators and Threats of Stink Bugs

Short Answer Key

1. Birds and spiders are two animals that prey on stink bugs.
2. The stink bug's odor warns predators to stay away.
3. Deforestation reduces the habitats where stink bugs can live and find food.
4. Stink bugs release a strong-smelling odor to scare away predators.
5. Stink bugs survive by laying many eggs, even though some may be lost to parasitoid wasps.
