## How Do Stink Bugs Move?

### Short Answer Key

1. Stink bugs often climb plant stems and leaves.
2. Stink bugs' wings help them fly to find food or escape predators.
3. Stink bugs' zigzag flying makes them look clumsy.
4. Stink bugs eat fruits and vegetables, and they climb plants to find food.
5. Stink bugs avoid water because they cannot swim and struggle to escape if they fall in.
