Urbanization and Our Changing Landscape: Balancing Land Use and Sustainability

Open-Ended Response Questions

1. In your own words, explain how urbanization can lead to habitat loss and why this is a significant concern for the environment.
2. Discuss the concept of sustainable transportation and provide examples of how it can benefit both urban areas and the environment.
3. How do Claude Monet's paintings, like the "Water Lilies" series, reflect the changing landscape due to urbanization? What message do these paintings convey about the relationship between cities and nature?
4. Imagine you are a city planner tasked with promoting environmental sustainability in a rapidly urbanizing area. What specific strategies would you propose to address land use and environmental concerns in your city?
