## Fashion Forward: Exploring Sustainability in the Fashion Industry

### Short Answer Key

1. One way is by using eco-friendly materials or materials made from recycled sources.
2. Slow fashion encourages consumers to buy fewer, high-quality items that last longer.
3. Recycling means turning old clothes into new fabrics, while upcycling means giving old garments a new life by transforming them into something different and stylish.
4. Making thoughtful choices helps support sustainability in the fashion industry by encouraging the purchase of eco-friendly and ethical products.
5. Sustainable fashion brands often prioritize fair wages and safe working conditions for garment workers.
