## The Symphony of Life: Exploring Biodiversity

### Short Answer Key

1. Biodiversity refers to the variety of life forms found in a particular ecosystem.
2. One ecosystem service provided by biodiversity is pollination, which is essential for the reproduction of plants.
3. Biodiversity enhances the resilience of ecosystems by allowing different species to respond to changes.
4. One threat to biodiversity mentioned in the passage is habitat destruction.
5. Actions that can be taken to protect biodiversity include preserving natural habitats, reducing pollution, and promoting responsible stewardship of natural resources.
