

Name _____

Grace Hopper: The Woman Who Made Computers Smarter

Open-Ended Response Answer Key

1. Without Grace Hopper, programming might still be difficult, with people using complicated number codes instead of words.
2. It was important because computers were difficult to use, and her work made them more accessible to businesses, governments, and everyday people.
3. I would ask her what inspired her to create COBOL because it changed the way people use computers.
4. We can learn that curiosity, hard work, and a passion for learning can lead to amazing discoveries that help the world.
