

Name _____

Ray Kurzweil: The Inventor Who Predicts the Future

Open-Ended Response Answer Key

1. We can learn that being curious, creative, and determined can help people invent amazing things.
2. Artificial intelligence may help doctors find cures for diseases, improve schools, and make life easier.
3. I would ask him what his next big invention will be because he has created so many amazing things.
4. Some predictions may come true, but others might take longer or need new discoveries to happen first.
