

Name _____

How Does the Ozone Layer Act Like Earth's Invisible Sunscreen?

Short Answer Key

1. Ozone is made of three oxygen atoms.
2. It blocks most of the sun's dangerous UV rays, like sunscreen protects your skin.
3. They can cause sunburns, skin cancer, and hurt plants and animals.
4. CFCs were chemicals used in spray cans and air conditioners.
5. It has started to heal since the Montreal Protocol reduced the use of CFCs.
