## What's the Difference Between "Good" Ozone and "Bad" Ozone?

### Short Answer Key

1. It blocks harmful UV rays from the sun.
2. Sunlight reacts with pollution from cars, factories, and power plants.
3. Because it pollutes the air and makes it hard to breathe.
4. It can irritate lungs, cause breathing problems, and make asthma worse.
5. Use less energy, drive less, or support clean air programs.
