## What's the Difference Between "Good" Ozone and "Bad" Ozone?

### Open-Ended Response Answer Key

1. Because it helps people understand which ozone is helpful and which can be harmful to our health.
2. There would be more UV rays, which could lead to more sunburns, skin cancer, and harm to the environment.
3. They can walk or bike instead of riding in a car, remind adults to use less energy, and learn about air pollution.
4. It shows that something can be helpful in one place (the stratosphere) and harmful in another (near the ground).
