## How Did the World Come Together to Protect the Ozone Layer?

### Short Answer Key

1. CFCs are chemicals once used in products like spray cans and refrigerators. They rise into the air and destroy ozone.
2. Above Antarctica
3. They signed the Montreal Protocol to stop or reduce using harmful chemicals.
4. From harmful ultraviolet (UV) rays from the sun
5. The ozone layer started to heal, and UV rays reaching Earth decreased.
