

Name _____

Can Repairing the Ozone Layer Help Fight Climate Change Too?

Short Answer Key

1. It blocks harmful UV rays that can hurt people, animals, and plants.
2. They are both greenhouse gases that trap heat in the atmosphere.
3. It banned CFCs, helping heal the ozone layer and lower greenhouse gases.
4. CFCs harm the ozone layer; HFCs don't, but they cause global warming.
5. They are working to reduce harmful gases like HFCs and use safer alternatives.
