

Name _____

What Happens When the Ozone Layer Is Damaged?

Short Answer Key

1. Ultraviolet (UV) rays from the sun
2. They spend more time outdoors and have more sensitive skin and eyes.
3. Plankton are the base of the food chain, so if they die, other sea animals have less to eat.
4. Their growth can slow down, and there may be less food for people and animals.
5. Countries are working together to ban harmful chemicals, and the ozone layer is starting to heal.
