

Name _____

The Thick-Skinned Komodo Dragon

Open-Ended Response Answer Key

1. The Komodo dragon is unique because of its large size, venom, and tough skin.
2. Komodo dragons help their environment stay clean by eating dead animals, which prevents decay and disease.
3. Baby Komodo dragons climb trees to avoid being eaten by adult Komodo dragons and other predators.
4. Challenges include habitat loss, limited range, and human interference.
