

Name _____

What Are a Monkey's Predators and Threats?

Short Answer Key

1. Leopards, eagles, and snakes are common predators of monkeys.
2. Deforestation harms monkeys by destroying their homes and reducing their food supply.
3. Monkeys warn each other about danger by calling out loudly.
4. Grooming helps monkeys remove parasites and keeps their fur clean, which prevents illness.
5. Humans harm monkeys by hunting them and destroying their habitats through deforestation and pollution.
