

Name _____

What Are Panda Predators and Threats?

Short Answer Key

1. Adult pandas are usually safe from predators because of their large size and strength.
2. Human activities like cutting down forests for farms, roads, and buildings cause habitat loss for pandas.
3. Bamboo is essential for pandas because it is their main food source. Without it, they cannot survive.
4. A panda's thick fur protects it from parasites like ticks.
5. Pandas climb trees to escape danger and avoid crowded areas to reduce the spread of disease.
