The Amazing Transformation of Urbanization: A Journey Through Time

Open-Ended Response Answer Key

1. Urbanization is the process of more people moving from rural areas to urban areas as societies grow. It has shaped our world by creating cities and leading to cultural, economic, and technological advancements over time.
2. Answers may vary. Students might consider the changes in their living conditions, job opportunities, and access to education, among other aspects.
3. Cities can address overcrowding and pollution by investing in public transportation, green spaces, and sustainable infrastructure. Promoting cleaner energy sources and efficient waste management systems can also help.
4. Strategies could include improving public transportation, creating green spaces and parks, implementing energy-efficient building codes, and investing in renewable energy sources. Providing affordable housing and supporting local businesses can make cities more inclusive.
