

Name _____

The Majestic Tiger: What Does It Look Like?

Short Answer Key

1. Each tiger's stripe pattern is unique, like fingerprints, making them identifiable.
2. Male tigers weigh between 300 and 600 pounds and can measure up to 10 feet long.
3. Tigers' sharp claws and teeth are used for catching prey and tearing meat.
4. The white spots on a tiger's ears help cubs follow their mother in the wild.
5. Tigers are endangered due to habitat loss and poaching.
