

Name _____

Where Tigers Roam

Open-Ended Response Answer Key

1. Forests provide cover for hunting and safety, while grasslands allow tigers to blend in and stalk prey.
2. Stopping illegal hunting protects tigers from extinction and preserves biodiversity.
3. Protecting tigers ensures their habitats are safe, benefiting all the plants and animals in those ecosystems.
4. People can support conservation efforts, donate to wildlife organizations, and educate others about the importance of tigers.
