

Name _____

What's on a Tiger's Menu?

Short Answer Key

1. Tigers commonly hunt deer, wild boar, and buffalo.
2. A tiger's striped fur helps it blend into the environment, making it harder for prey to see them.
3. Tigers hunt alone because they are solitary animals and do not work in groups.
4. Tigers use their sharp teeth, strong jaws, and claws to catch and kill their prey.
5. Hunting helps the environment by preventing herbivores from overgrazing and damaging ecosystems.
