

Name _____

The Life of a Tiger: From Cub to King

Short Answer Key

1. Tiger cubs rely on their mother for warmth, food, and protection.
2. Playtime helps cubs learn hunting skills like stalking and pouncing.
3. Tiger cubs begin hunting with their mother around 18 to 24 months old.
4. Adult tigers live alone, while cubs stay with their mother and siblings.
5. Tigers face challenges like finding food, avoiding predators, and establishing territory.
