## Timeless Impact

### Open-Ended Response Answer Key

1. Students might suggest rules like no touching anything, no interacting with people or animals, or only observing history without changing it.
2. Some may argue that humans should be allowed to use technology to improve life, while others may say changing nature or history is too dangerous.
3. Students could share personal experiences, such as saying something kind that led to a new friendship or making a small mistake that had a big effect.
4. Responses might explore how decisions about science and technology, such as climate policies or artificial intelligence, can shape the future in unexpected ways.
