

Name _____

Must-Have Tools for Every Gardener

Short Answer Key

1. A pruning saw is primarily used for cutting thicker branches and tree limbs in gardening.
2. A garden fork is important for maintaining healthy soil in a garden by turning over and aerating the soil, breaking up compacted soil, and mixing in compost.
3. A garden kneeler can serve a dual purpose by providing a comfortable surface for kneeling or sitting while gardening and, when flipped over, functioning as a bench or seat.
4. A garden rake can be used for leveling the soil and removing debris, such as leaves and grass clippings, from the garden.
5. Factors to consider when choosing garden gloves include fit, comfort, and grip, as well as protection from thorns and sharp objects.
