## Sewing Essentials: Tools and Supplies for Crafting Magic

### Short Answer Key

1. Three types of needles are universal needles (for general use), ballpoint needles (for knits), and denim needles (for heavy fabrics).
2. Having a variety of thread colors allows you to match the thread to the fabric, ensuring that your stitches blend in and the final product looks neat.
3. Bias tape is primarily used for finishing edges, adding decorative trims, and creating casings for elastic or drawstrings.
4. Two types of closures for clothing and bags other than buttons and zippers are Velcro or hook-and-loop tape and snaps.
5. Pressing fabric and seams with an iron and ironing board helps flatten and set the stitches, making the sewing project look more professional and polished.
