

Name _____

3D Printing vs. Traditional Manufacturing: The Battle of the Makers!

Short Answer

1. Explain how 3D printing contributes to reduced waste in manufacturing.
2. Give an example of a product that benefits from the customization offered by 3D printing.
3. How does 3D printing make small-batch production more cost-effective?
4. What is rapid prototyping, and why is 3D printing well-suited for it?
5. Describe the precision and complexity advantages of 3D printing in your own words.
