## The Three Magical Types of Data Analytics

### Open-Ended Response Questions

1. Imagine you are a business owner. How could the use of Data Analytics (Descriptive, Predictive, and Prescriptive) benefit your company? Provide at least two potential advantages.
2. Discuss a real-life scenario where Data Analytics played a crucial role in solving a problem or making a significant discovery.
3. Explain why it's important for organizations to use all three types of Data Analytics together rather than relying on just one.
4. How can individuals benefit from applying Data Analytics in their daily lives?
