## Immune Warriors: Understanding the Different Types of Immune Cells

### Multiple Choice Questions

1. Which immune cell patrols tissues and scavenges for foreign invaders?

- A) Macrophages
- B) T Lymphocytes
- C) B Lymphocytes
- D) Neutrophils

2. What is the role of T cells in the immune system?

- A) Producing antibodies
- B) Killing infected cells
- C) Coordinating immune responses
- D) Scavenging for pathogens

3. Which immune cells are responsible for producing antibodies?

- A) Macrophages
- B) T Lymphocytes
- C) Dendritic Cells
- D) B Lymphocytes

4. What is the function of Natural Killer (NK) cells?

- A) Producing antibodies
- B) Targeting and destroying infected cells
- C) Scavenging for pathogens
- D) Presenting antigens to other immune cells

5. What is the role of dendritic cells in the immune system?

- A) Killing infected cells
- B) Producing antibodies
- C) Delivering information about invaders to other immune cells
- D) Scavenging for pathogens
