

Name _____

Under Siege: Exploring Threats to Biodiversity

Multiple Choice Questions

1. What is one of the main threats to biodiversity discussed in the passage?
 - a) Climate change
 - b) Conservation efforts
 - c) Sustainable resource management
 - d) Habitat restoration

2. How does habitat destruction affect biodiversity?
 - a) It increases food availability for wildlife
 - b) It reduces habitat availability and disrupts ecosystems
 - c) It promotes species diversity
 - d) It has no impact on biodiversity

3. What is overexploitation of natural resources?
 - a) Unsustainable harvesting practices that deplete populations of wildlife and plants
 - b) Sustainable fishing practices
 - c) Conservation efforts to protect habitats
 - d) Climate change mitigation strategies

4. What is a consequence of pollution on biodiversity?
 - a) Increased species diversity
 - b) Enhanced ecosystem resilience
 - c) Improved air and water quality
 - d) Harm to wildlife and habitats

5. How do invasive species threaten biodiversity?
 - a) By promoting native species survival
 - b) By enhancing ecosystem stability
 - c) By outcompeting native species and introducing diseases
 - d) By restoring degraded habitats
