Name _____

Unraveling the Mystery of Chemical Potential Energy

Short Answer

1. Explain the concept of chemical potential energy and provide an example.

2. How do chemical bonds contribute to the storage of chemical potential energy?

3. Describe the process by which chemical potential energy is released during chemical reactions.

4. Give two examples from daily life where chemical potential energy plays a significant role.

5. Differentiate between covalent and ionic bonds in terms of chemical potential energy storage.
